PROFESSIONAL SUMMARY

Geospatial professional with over nine years of experience across GIS analysis, spatial data management, enterprise GIS, cartography, remote sensing, data quality, technical documentation, research, training, data analytics, and AI training and evaluation. Experienced in supporting global ArcGIS users, designing and validating spatial data infrastructure, producing decision-support outputs, conducting applied geospatial research, training field and technical teams, and delivering complex work independently across distributed environments. Combines strong geospatial domain expertise with quality assurance, reproducible workflow design, analytical problem solving, and structured evaluation of technical and AI-generated outputs.

CORE GIS, DATA & AI EXPERTISE

GIS Platforms: ArcGIS Pro 3.x · ArcGIS Enterprise · ArcGIS Online · ArcMap · QGIS · ArcGIS Dashboards · ArcGIS Experience Builder

Spatial Data Quality: attribute validation · geometry and feature checks · coordinate systems · projections · spatial-reference troubleshooting · completeness and consistency review · duplicate and anomaly detection · issue correction

Geodatabases & Data Management: ArcGIS geodatabases · enterprise geodatabase architecture · PostgreSQL/PostGIS · SQL · data loading and interoperability · metadata standards · version control

Mapping & Spatial Analysis: vector and raster analysis · geoprocessing · land-use and land-cover analysis · GPS field mapping · remote sensing · map editing · thematic cartography · layouts and dashboards

Earth Observation & Environmental Analysis: Google Earth Engine · Sentinel-2 · Copernicus · OpenEO · WEkEO · ClimateSERV · change detection · environmental monitoring

Programming, Analytics & Automation: Python · ArcPy · GeoPandas · Rasterio · R · SQL · Power BI · batch scripting · reproducible GIS workflows

AI Training & Evaluation: rubric-based evaluation · output quality assessment · annotation and labeling QA · consistency review · structured feedback · prompt and workflow development · technical validation

Technical Delivery & Communication: technical documentation · knowledge-base writing · workflow design · training · stakeholder communication · remote collaboration · cross-functional delivery

PROFESSIONAL EXPERIENCE

QGIS Expert and AI Trainer | AI Training & Evaluation Contributor

Micro1 Inc. | Remote | April 2026 - July 2026

- Led end-to-end GIS projects covering spatial data acquisition, cleaning, validation, coordinate systems, geoprocessing, symbology, cartographic layout production, and final-output quality.
- Reviewed source datasets and geospatial outputs against technical requirements, identifying attribute, geometry, CRS, classification, completeness, and consistency issues and documenting corrective actions.
- Validated maps and datasets through source-to-output reconciliation, feature and extent checks, coordinate-system verification, output inspection, and reproducible quality-assurance procedures.
- Created workflow guides, QA checklists, reviewer notes, prompts, evaluation standards, and troubleshooting records that made technical decisions traceable and repeatable.
- Evaluated AI-generated outputs using detailed rubrics and quality standards, providing structured feedback across GIS and Microsoft 365 workflows to support consistency and model improvement.

SELECTED RESEARCH & PROFESSIONAL EXPERTISE

Spatial Strategies for Peace

- Applied spatial analysis to armed-group activity, cross-border movement, and displacement patterns in urban and peri-urban areas of Eastern Democratic Republic of the Congo through research with the Harvard Humanitarian Initiative.

Geospatial Research & Applied Remote Sensing

- Research experience spans NOAA ROV dive-track modelling, Fall Armyworm spread mapping, land-use change monitoring, and satellite-based flood classification with ArcGIS Pro and Python.

AI Training, Evaluation & Quality Assurance

- Experience evaluating AI-generated outputs against detailed rubrics and technical standards, producing structured feedback, documenting quality issues, developing prompts and workflows, and supporting consistent model-training and evaluation processes.

GIS Specialist - THRIVE 2030 Kenya Project

World Vision International | Nairobi, Kenya | June 2024 - January 2026

- Worked closely with the Design, Monitoring, Evaluation, Accountability and Learning (DMEAL) team on programme monitoring, donor reporting, national planning, integrated data infrastructure, and evidence-based decision support.
- Designed and managed GIS infrastructure combining household, environmental, land-use, and spatial datasets for 300,000+ households, applying completeness, consistency, geolocation, metadata, version-control, and change-tracking checks.
- Validated GPS and field records, investigated location and attribute inconsistencies, and produced corrected spatial datasets, maps, dashboards, and analytical outputs for programme targeting and strategic planning.
- Trained 70+ field staff and developed step-by-step materials and troubleshooting guidance to improve field data collection, documentation, validation, and geolocation accuracy.

Urban Planner and GIS Analyst

United Nations Human Settlements Programme (UN-Habitat) | Nairobi, Kenya | May 2023 - November 2023

- Reviewed, integrated, and validated multi-source topographic, land-cover, socioeconomic, road, boundary, and coastal-planning datasets, applying metadata, classification, and quality standards.
- Developed a Spatial Data Hub and ArcGIS Dashboard for stakeholder engagement, data sharing, programme reporting, and evidence-based planning.
- Produced maps, spatial outputs, workflow documentation, and technical briefs for cross-functional urban, coastal, and infrastructure-planning teams.

GIS Analyst

Environmental Systems Research Institute (Esri) | Redlands, CA, USA | February 2020 - February 2023

- Supported global users of ArcGIS Pro and ArcGIS Enterprise across infrastructure, land-management, environmental-monitoring, and related sectors, building deep expertise in enterprise GIS and spatial-data quality.
- Reviewed technical cases, user-provided datasets, geodatabases, diagnostic information, and workflow descriptions; reproduced issues, isolated root causes, validated outputs, and communicated precise resolutions.
- Diagnosed and resolved spatial-reference conflicts, attribute inconsistencies, schema problems, data-integrity errors, and enterprise geodatabase workflow issues affecting production GIS environments.
- Documented defects, reproduction steps, severity, corrective actions, and validation evidence for product and engineering teams.
- Authored technical guides and knowledge-base articles and worked remotely across time zones with consistent independent delivery and cross-functional collaboration.

Spatial Data Analyst

REGID Carbon Limited | Nairobi, Kenya | March 2023 - May 2023

- Analyzed, classified, and validated georeferenced data and satellite-derived outputs for ecosystem-restoration and carbon-accounting projects across Kenya, Zimbabwe, and Senegal, maintaining accuracy, traceability, and documentation standards.
- Applied Earth Observation and change-detection techniques to assess deforestation, land-use transitions, and environmental change.

EDUCATION

MSc, Geographic Information Science (GIS) and Cartography December 2019

University of Redlands | Redlands, CA, USA

Research: *Spatial Representation of NOAA's Remotely Operated Vehicles (ROVs) Dive Tracks*

Award: *Jack Dangermond GIS Scholarship*

Bachelor of Environmental Planning and Management December 2018

Kenyatta University | Nairobi, Kenya

Research: *Mapping the 2017 spreading pattern of Fall Armyworm (Spodoptera frugiperda) and its implications on maize in Molo, Nakuru County*

Award: *Esri 2018 GIS Young Scholar Award*

SELECTED CERTIFICATIONS AND PROFESSIONAL TRAINING

- **Esri** | ArcGIS Pro Associate 2101 (June 2022)
- **Anthropic** | Claude Code 101 (August 2026)
- **SurveyCTO Academy** | Foundations of SurveyCTO (April 2026)
- **FAO** | Global Forest Resources Assessment 2025 (March 2026)
- **McKinsey & Company** | McKinsey.org Forward Program (December 2025)
- **The World Bank Group** | Documenting Development Data Using Metadata Standards (December 2025)
- **Cisco** | Introduction to Modern AI (August 2025)
- **Google** | Foundations of Project Management (December 2022)
